ACTIVITY**PERSONNEL ASSIGNED**

Maintain close observation of the burned area until the fire is completely extinguished:

Maintain contact with weather station until the fire is extinguished:

Take immediate positive action to ensure safety of the fire should a dangerous change in the weather occur or be forecast:

Check perimeter for firebrand sources such as trees, posts, cow chips, logs, etc:

Misc. Notes/Comments: _____

Other considerations:

Consider not burning log-littered areas if the weather forecast is for strong winds within 3 days following a burn.

Consider not burning within 12 hours of a predicted wind shift.

When graded or bladed strips are used as fireguards, rolls of soil should be left on the side of the area next to the fence or away from area to be burned.

Continuously monitor weather factors affecting fire behavior.

Map(s) of Area to be Burned

Include items such as legend, magnetic north, water sources, roads, gates, safety zones, escape routes, fire guards, areas to be protected, ignition area, smoke sensitive areas, special precautions etc.
